## What's New In iPhoneFS?

iPhoneFS lets you see the iPhone as a network drive in Windows explorer and any Windows application. iPhoneFS is based on the iOS Filesystem service, and mounts it to the root folder of your /Library/iTunes/iPod folder. iPhoneFS maps the CIFS functions to the functions on the iPhone and takes the photo galleries, contacts and bookmarks, and the home screen, and makes them appear like a network drive. iPhoneFS Features: Show and use the iPhone as a network drive. See and play songs on the iPhone by using Windows Media Player 11. Play movies from the Photos Gallery. See all files on the iPhone when you browse your iTunes folder. See contacts, mail, music, bookmarks, apps, and Home Screen. Makes photos albums, notes, calendar, reminders, and contacts sync. Automatically import photos from the iPhone to Windows, if you have iPhone Explorer. Run any Windows application with the iPhone mounted as a network drive. Manage the iPhone settings through the Phone section of Windows Control Panel. iPhoneFS also comes with the Xcode tools to help you build iOS apps. Installing iPhoneFS: After downloading the download and unzipping it, double click on the install icon. It will extract the iPhoneFS installer to the iPhoneFS folder which should be found in the C:\Users\%USERNAME%\Documents\iFUSE folder. When the install has completed, the iPhoneFS service and iFUSE app will be running. If you wish to exit the installer, hold down the Windows key on your keyboard, and hit the X button. To start the service from the command line, type the following: iPhonefs --start To stop the service, type: iPhonefs --stop To disable the service, type: iPhonefs --disable To enable the service, type: iPhonefs --enable Running iPhoneFS: To see the iPhoneFS window, go to Windows Explorer, and look in the C:\Users\%USERNAME%\Documents\iFUSE folder for iPhoneFS.exe, which should be a.zip file. Double click on the exe and it will start. You will be prompted to allow the iFUSE service to run in the background. Once allowed, the iPhoneFS service will be running in the background. The interface will only start after the service is running. Once you have started the iPhoneFS window, you will see the main window on the right side. Click the Stop button to stop the service. The service will now no longer be running. You can restart the service by clicking the Start button. Notes: You cannot start the service with an admin user account. iPhoneFS only works with the iTunes 11 update that came
