Field of the Invention The present invention relates to a liquid ejection device, a control method of a liquid ejection device, and a computer-readable recording medium recording the control method of the liquid ejection device. 2. In addition, as described in Japanese Patent Laid-Open No. 2005-242728, in the image recording apparatus, the carriage having the print head mounted thereon is mounted on a body, and the carriage is moved in a main scanning direction and a sub-scanning direction while ejecting ink droplets from the nozzles onto the medium. As a method for ejecting ink droplets from
